Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/08/2009 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 106-117 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 106-117 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Weil et al, US Patent No. 5,475,041.
3. Weil et al discloses a flame retardant composition comprising a polyolefin or olefin copolymer and an intumescent, melamine or melamine salt additive in an amount ranging from 5-150 phr/ 100 phr of the polyolefin. (See col. 3, lines 50-60 and col. 5, lines 10-18.)
4. The composition also comprises polyphenylene oxide, (PPO). The PPO may be modified to provide miscibility and blendability, (col. 3, line 50 through col. 4, line 62)
5. Other compatibilizers may also be included such as EVA. The compositions are used to insulate cables, (col. 5, lines 59-67).
6. Example 1 of the patent comprises ethylene-propylene-hexadiene copolymer, melamine and PPO and results in a flexible elastomer being produced. Example 20 substitutes polyethylene for the ethylene-propylene-hexadiene copolymer. Since the end products of Weil et al are elastomeric, it is clear that at least one of the binder resins is also elastomeric, (Col. 5, lines 34-48).
7. No patentable difference is readily ascertained between the present and patented inventions. It would have been obvious to the ordinary practitioner of this art to modify the PPO of Weil et al in the manner disclosed, to achieve the necessary elasticity to produce compositions suitable for forming cable insulating materials.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 571-272-1122. The examiner can normally be reached on Monday through Thursday 8:30am-7:00pm.
